SUMMARY

I build scalable, high-performance web applications using modern technologies like React.js, Next.js, Node.js, and Ruby on Rails. I enjoy crafting clean and responsive user interfaces, designing reliable APIs, and making sure backend systems run efficiently with databases like PostgreSQL and MongoDB.

I've worked on real-world, production-ready projects including SaaS platforms, content management systems, and full-stack news applications. I have a solid understanding of software architecture, authentication systems, and deploying applications using Docker, and I focus on writing clean, maintainable code that performs well in real environments.

TECHNICAL SKILLS

Languages

JavaScript, TypeScript,
Ruby, Python

Frontend Development

React.js, Next.js, Vue.js,
HTML5, CSS3, Tailwind
CSS

Backend Development

Node.js, Express.js,
Ruby on Rails

APIs

REST APIs, GraphQL,
Hasura GraphQL

Databases

PostgreSQL, MongoDB,
MySQL

DevOps & Tools

Docker, AWS, Vercel,
Heroku, Git, CI/CD, Linux,
Jira, GitHub/GitLab

CMS/Platforms

Maglev CMS,
Salesforce CRM, LWC,
Apex

PROFESSIONAL EXPERIENCE

Full Stack Developer

Aug 2024 - Present

InitCoders | Jodhpur, Rajasthan

- Built scalable web applications using Ruby on Rails, Vue.js, and React.js for SaaS and business platforms.
- Designed and built RESTful APIs for frontend systems and third-party integrations.
- Implemented secure authentication using JWT and role-based access control (RBAC).
- Optimized PostgreSQL queries to improve performance and backend efficiency.
- Contributed to scalable system architecture and developed responsive, user-friendly interfaces.
- Collaborated with cross-functional teams to deliver scalable and maintainable solutions.
- Deployed applications using Docker, CI/CD (GitHub Actions), AWS, Heroku and Vercel.
- Configured Nginx, PM2, and Linux servers with SSL and reverse proxy for production environments.

EDUCATION

Bachelor of Technology (B.Tech) in Machine Learning and Computing

Aug 2019 - Sept 2023

JIET Institute of Design and Technology, Jodhpur, Rajasthan
CGPA: 7.6

CoachVantage – SaaS Platform

Tech Stack: Ruby on Rails, Vue.js, Hasura GraphQL, PostgreSQL

- Engineered scalable backend modules and integrated GraphQL APIs for efficient data handling.
- Enabled real-time data synchronization between frontend and backend services.
- Contributed to feature development, performance optimization, and production support.
- Incorporated third-party services including Cronofy, Zoom, Stripe, and PayPal.
- Collaborated with cross-functional teams to improve platform reliability and functionality.
- Deployed applications using CI/CD pipelines for streamlined releases.

Manidweep – Organizational Portfolio Website

Tech Stack: Ruby on Rails, PostgreSQL

- Built a dynamic portfolio website with CMS-driven content management.
- Built modular components enabling easy content updates by non-technical users.
- Optimized performance and improved page load speed.
- Incorporated Razorpay payment gateway for donation-based payments.
- Deployed and maintained the application in production.

Agxcel – Agricultural E-commerce Platform

Tech Stack: Ruby on Rails, PostgreSQL

- Engineered a scalable e-commerce platform for agricultural products.
- Implemented product catalog and shopping workflows, and secure payment systems.
- Built admin dashboards for managing products, orders, and inventory.
- Engineered custom business logic for multiple customer types and dynamic pricing.
- Integrated Stripe for secure payment processing.

Source Direct Imports – Business Portfolio Website

Tech Stack: Ruby on Rails, PostgreSQL, AWS

- Implemented a corporate website for a bathroom accessories manufacturer.
- Created product catalog and showcase modules.
- Crafted responsive layouts with a focus on performance and SEO.

American Studio – Fashion Brand Website

Tech Stack: Ruby on Rails, PostgreSQL, AWS

- Developed a responsive website showcasing product collections and brand identity.
- Created product galleries, contact forms, and UI components.
- Ensured performance optimization and mobile responsiveness.

Custom CMS System (Maglev Editor)

Tech Stack: Ruby on Rails, Maglev CMS, AWS

- Engineered a custom CMS enabling dynamic website creation.
- Built reusable content blocks and modular page components.
- Enabled non-technical users to manage content through an intuitive interface.
- Applied role-based access control for secure content management.
- Deployed a multi-site capable system similar to WordPress.

Echowest – Salesforce CRM Implementation

Tech Stack: Salesforce

- Supported implementation of Salesforce CRM workflows and automation.
- Configured data models and customized business processes.
- Supported integration of Salesforce with existing systems.
